

## 'Green' products for ASTs offered

Reduced aboveground storage tank environmental contamination is offered by these **emission control products**.

**MesaThane** floating roof seal materials (MesaThane alternative for extreme chemical environments) is suited for AST primary and secondary curtain seals at the floating roof rim area, foam log/envelope seals, vapor bladders, pontoon liners, or repair bladders.

VaporGuard Leg Boots reduce emissions caused by vapors escaping from floating roof support legs. The "socks" form a covering for the support legs to seal-in hydrocarbon vapors. They reduce vapors from escaping through slots in AST slotted gauge

poles.

Gauge pole covers form a casing around the exterior of the slotted gauge pole.
