

Seals for internal floating roof tanks

MesaWedge SC-1000 seal systems are designed to prevent product loss and atmospheric contamination from internal floating roof tanks. MesaWedge can be configured as a single wiper primary seal system or double wiper primary and secondary seal system.

Among features: high flexibility and abrasion resistance; high chemical resistance; 65-A Duro Urethane (thermoset); available widths of 9 to 16 in.; temperature range of -20°F to 150°F; factory splicing or field splicing kit available; and pre-radiused sections available for tanks under 40 ft in diameter.
