

AMERICAN OWNED. AMERICAN BUILT.

## CUSTOM DESIGNED SEALS & RIM MOUNTED FOAM DAMS

WG Seals is Mesa ETP's premier seal system for floating roofs in above ground storage tanks (ASTs). The industry's leading storage terminal owners, refineries, pipelines, and AST contractors have been using the WG Seal system for over 35 years with thousands of installations worldwide. The WG Seal is the proven and trusted seal system.

The WG Seal system components include:

- Mechanical shoe primary seal (available in stainless steel or galvanized steel, in multiple heights)
- Multiple seal fabrics to choose from depending on the tank product – see our “Chart A” for details
- Compression plate secondary seal with gasketed vapor barrier (available in stainless steel or galvanized steel)
- Secondary seal tips (multiple to choose from depending on the tank – see back for details)
- Rim-mounted foam dam (available in stainless steel or galvanized steel, in multiple heights)
- Wax scrapers
- Grounding shunts (API 545 version also available)
- Standard Anti-Hang Up Devices for EFRT
- Mounting hardware is also available in stainless steel or galvanized steel.
- Foam Logs Available
- MesaWedge Wiper Seal Also Available

## WG SEALS

### PRIMARY AND SECONDARY AST SEALS

# WG SEALS

ENGINEERED PRODUCTS FOR ABOVEGROUND STORAGE TANKS  
PRIMARY AND SECONDARY AST SEALS

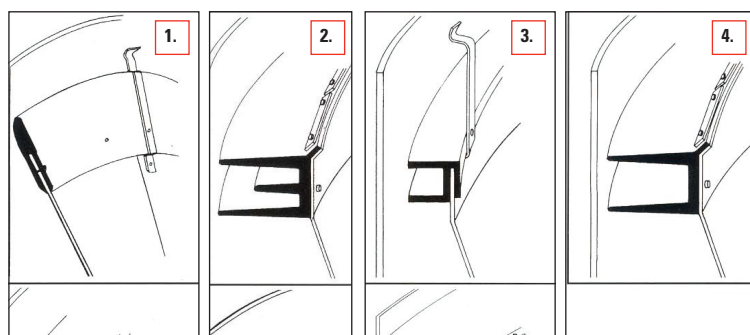

By custom designing each AST floating roof seal, the WG Seal system provides superior performance and has earned the industry's designation: Best Available Control Technology (BACT).

## KEY FEATURES & BENEFITS

- Adaptable to existing or new floating roofs
- Compatible with most stored products including 100% aromatics
- Able to be installed while the tank remains in service (no welding or flame cutting)
- Meets local and federal codes, including BAAQMD & SCAQMD
- Faster installation compared to other seal systems
- Adaptable to severely out-of-round tanks

## SECONDARY SEAL WIPER TIPS

Mesa ETP secondary seal tips / Wiper Tips are used in conjunction with compression plate secondary seals. Nitrile/Vinyl compounds are standard with other materials available upon request. Seal tips effectively hold up to abrasion, hydrocarbons, ozone, water, sunlight, and temperature. They offer fast and easy installation on metallic compression plate systems. Seal tips provide excellent hydrolytic stability and UV resistance for long service lives.

### PART DESCRIPTION

1. SINGLE BLADE WIPER TIP, 5 IN, VERTICAL MOUNTING
2. "E" SEAL WIPER TIP FOR RIVETED TANKS, 4 IN, VERTICAL MOUNTING
3. DUO WIPER TIP, 1 1/2 IN, VERTICAL MOUNTING
4. BUBBLE WIPER TIP
